

# **Econofast Shipping Systems: Helping Businesses Become More Efficient, More Profitable, More Powerful**

From the time we acquired our very first customer in 1995, Econofast Shipping Systems has helped a long line of client companies improve their bottom line and enhance their ability to compete.

## **What We Do**

As a third-party logistics consulting company, we provide our customers with the opportunity to take their shipping operation to a new level of efficiency while simultaneously decreasing shipping expenses *and* shipping-related problems. Profits are increased, and headaches decreased.

As a result, each of our client companies becomes a more profitable and dynamic business, and a more formidable and powerful competitor.

And not only do we help customers save on their *current* freight costs, we also help customers reduce *past* expenditures through the process of freight bill auditing. Our expert auditors have helped companies recover hundreds of thousands of dollars in refunded overcharges.

## **What Econofast is Really all About: You**

At Econofast, we take pride in what we do.

We take pride in helping each of our customers increase the efficiency of their shipping operation and improve their bottom line. But we also realize that all of our experience and expertise is of no value unless they are unerringly channeled toward assisting you, our customer, in achieving your goals.

It's for that reason that we proudly point to one of our most significant accomplishments: That very first customer we acquired back in 1995 is *still* our customer.

And that speaks volumes about the quality, value and commitment we offer our customers.
