**FOR IMMEDIATE RELEASE** *(or preferred date of release)*

## **Media Giant Design Recognized as Most Successful Web Development Firm in America**

On October 11, 2011, Media Giant Design achieved the honor of being rated the #1 web development firm in America according to Elance.com. “We’re in a fiercely competitive field,” said owner and president [name deleted] “and this is a goal we’ve been working towards for years. With more than 120,000 web design and development firms worldwide, it’s definitely been a long road getting here. We like to think of ourselves as proof that the old fashioned American success story is still possible, even in this age of massive global competition.”

Media Giant Design provides a service that is undeniably becoming a necessity in today’s world: they help businesses get online. With the world of commerce rapidly moving online, businesses of all sizes are facing a ‘get online or get left behind’ scenario.

According to the U.S. Commerce Department, \$47.5 billion was spent online in just the second quarter of 2011. And that’s an increase of 3% over the previous quarter. More than ever, the world’s population is turning to the Internet to do their shopping, their fact-finding and their socializing.

Though having a web presence is crucial for all businesses, simply getting online isn't enough. A shoddy, amateurish website will be no more effective at attracting business than a hand-scrawled 'open for business' sign posted along a roadside.

"I think that at least partly, our success is a result of the extra effort we invest in creating quality websites that are customized to our customers' needs and goals," said [name deleted]. "We understand that each business is unique, and each business website should be unique. You can certainly go to an overseas web development firm and get a cheap cookie-cutter site for your business, but that's not the path to online success" said [name deleted]. "We create successful websites for our clients by taking the time to listen to them and by making an effort to understand their business. We apply our expertise to our clients' vision to produce websites that blow their competitors away."

Media Giant Design is based in Port Saint Lucie, Florida. With a staff that represents a total of more than 52 years of web development and programming experience, Media Giant stands ready to help businesses of all sizes achieve online success.
