

Getting a Bit Nauseous From Wild Stock Market Rides?

Dear ,

If you're invested in stocks, you know that the ride has been anything but boring. When it comes to investments, though, boring can be a very good thing.

And while the real estate market has experienced its own ups and downs, surveys have shown that Americans consider it the best long-term investment vehicle.

Did You Know That There's An Alternative Means of Investing in Real Estate?

It's called private lending, and it frees you from the hassles of traditional real estate investments. No worries about dealing with tenants. No maintenance issues. No property taxes to pay. Stable returns.

On whateverdate, we'll be hosting an educational seminar about private lending. Both the seminar and the dinner that we'll provide will be free. And because of the success you've achieved, you're among the select group of investors that have been invited.

Why is This Seminar Worth a Couple Hours of Your Precious Time?

- You'll learn more about why private lending can be a lower-risk alternative investment vehicle that typically returns higher-than-market rates.
- You'll learn why private lending investment offers a haven of stability compared to stocks, and can be a great way to compliment your stock portfolio.
- You'll come away from this seminar with knowledge that could change the course of your financial future.

At the *very least* you'll come away with some intriguing food for thought. And you should know that this seminar places you under no obligation to purchase any product or service, or enroll in any investment program.

Simply phone us at **xxx-xxx-xxxx**, or visit our website at **whateverpage.com** to secure your free reservation. I look forward to meeting you at the seminar.

Sincerely,
