

Introducing the Next Generation

BRUT

The World's Best Selling Regulator
From an Industry Icon

The BRUT box transforms into a point of sale display with simple-to-read features / benefits

Sherwood Scuba's BRUT regulators have been in continuous production for decades, with hundreds of thousands in service worldwide. And as the #1 choice of dive schools and rental operators, the BRUT regulator has been among the most popular in its class.

That's about to change.

The new BRUT regulator is so improved, it's destined to become **THE DOMINANT** regulator in its class.

Improvements in design and materials have resulted in an easier-breathing, more user-friendly regulator.

And the legendary durability and reliability of the BRUT has been enhanced with an environmentally sealed first stage. Sealing out water

eliminates sediment build-up and helps protect from corrosion.

The result? Even greater reliability and reduced maintenance requirements.

WHY WORK TO IMPROVE A GREAT PRODUCT?

Because leaders lead.

When you hear the name IBM, you think computers.

And when you hear Sherwood, you think regulators.

After decades and decades of industry leadership, the giants of any industry almost become that industry. And leaders don't retain their position of dominance by resting on their laurels.

That's why – after more than half a century as a leading global manufacturer of scuba equipment – Sherwood continues to strive for excellence.

You'd expect nothing less from an industry icon.
